

**Supplementary Table 10. Significant eQTL associations of fine-mapped variants and HEM genes.**

This table contains a list of significant eQTL associations (FDR<0.05) with details for fine-mapped variants (posterior probability>50%, see **Online Methods** and **Supplementary\_Table 3**).

**Fine mapped SNP (rsID):** rs ID of the fine-mapped variants retrieved from NCBI's dbSNP build v150; **Position:** base pair position of the lead SNP (in "chromosome:base pair" format), genomic positions were retrieved from NCBI's dbSNP build v150 (genome build hg19); **Posterior probability:** posterior probability of causality to each SNP variant; **SNP Type:** functional consequence of the SNP obtained from ANNOVAR; **eQTL database:** Data source of eQTLs from the 10 repositories (see **Online Methods**); **tissue:** tissue type of the eQTL association; **EnsemblID:** gene ID extracted from ensembl database GRCh38.p13 (www.ensembl.org/); **Gene symbol:** gene ID extracted from HUGO Gene Nomenclature Committee; **P.FDR:** P-value of eQTLs after FDR correction for multiple comparisons at  $\alpha=0.05$ .

| Fine mapped SNP (rsID) | Position    | Posterior probability | SNP Type   | eQTL database | tissue                        | EnsemblID       | Gene symbol | P.FDR   |
