

Supplementary Table 4. Association of HEM risk variants with other traits and diseases.

This table contains other reported GWAS associations of 102 lead SNPs (and/or their r2>0.8 LD proxies) of HEM for other traits, extracted from three PheWAS databases: PhenoScanner, GWAS catalog and GWAS Atlas.

Lead SNP (rsID): rs ID retrieved from NCBI's dbSNP build v150; **Lead SNP BP:** base pair position of the lead SNP (in "chromosome:base pair" format); genomic positions were retrieved from NCBI's dbSNP build v150 (genome build hg19); **Proxy SNP (r2):** the name of a SNP in LD (r2>0.8) with the lead SNP and has a reported GWAS association with the lead SNP or its proxy SNP; **Domain:** the assigned trait category of the trait (only available for traits from GWAS ATLAS); **PheWAS database:** the database where the reported association is extracted from; **Data source or PUBMEDID:** the publication reference or data source (UKBB, <http://www.nealelab.is/uk-biobank/>) of the reported GWAS association.

Lead SNP (rsID)	Lead SNP BP	Proxy SNP (rsID)	Proxy SNP BP	r ²	Associated trait	Domain	PheWAS database	Data source or PUBMEDID
