Supplementary Materials

1. Supplementary Figures

Supplementary Figure S1. Percentage of risk of biases of included randomized controlled trials.

Supplementary Figure S2. Forest plots: Sensitivity analysis with alternative method for standard deviation imputation.

2. Appendix

Appendix 1. Full search strategy

Figure S1 Percentage of risk of biases of included randomized controlled trials.

Figure S2A Forest plot showing the effect of active substance versus normal saline on pain reduction within one hour with alternative method for standard deviation imputation.

Figure S2B Forest plot showing the effect of active substance versus normal saline on pain reduction at 1–1.5 months follow-up visit with alternative method for standard deviation imputation.

Figure S2C Forest plot showing the effect of active substance versus normal saline on pain reduction at 3–6 months follow-up visit with alternative method for standard deviation imputation.
