

Questionnaire survey content

Part A provided full information about the survey and obtained consent.

Part B included questions about:

- Osteopath's gender, age, and nationality
- Number of years of experience as an osteopath after initial graduation
- Practicing status
- Academic qualifications
- Working status as an osteopath (i.e. independent, employee)
- Location of practice (urban or rural)
- Practice environment (i.e. private practice, group practice with other osteopaths, interdisciplinary practice, clinic, hospital)

Part C included questions about:

- Description of patient and underlying condition:
 - Month of encounter for selected patient
 - Patient's age
 - Patient's gender
 - Primary reason for consultation
 - Co-existing known conditions
 - Duration of actual episode
 - Type of onset of symptoms
 - Localisation of symptoms
 - Impact of symptoms on daily life
 - Prior care for actual episode
 - Any health professional who referred the patient
- Description of first encounter:
 - Informed consent for examination and treatment
 - Treatment techniques employed during first encounter
 - Use of adjunct therapies
 - Recommendation of self-management strategies
 - Duration of first encounter
- Subsequent encounters:

- Number of encounters for primary reason for consultation
- Number of subsequent treatments (including adjunct therapies and self-management strategies)
- If applicable, description of referral to other health professional
