**Supplementary Figure 1. Manhattan plot.** Manhattan plot of the sexes-combined analysis for WHRadjBMI. All suggestively significant ( $P < 1 \times 10^{-6}$ ) variants are highlighted in orange if they are  $> 500$  Kb from any previously-reported WHRadjBMI associated variants. Previously reported loci (+/- 500 Kb) are highlighted in blue if any variant in the locus reached suggestive significance. All suggestively significant loci that meet our criteria for replication are annotated with the closest gene. †Replicated in African American meta-analysis. ‡ Replicated in Hispanic/Latino meta-analysis. †† Replicated in European American meta-analysis.

**Supplementary Figure 2. Locus Zoom Plots.** Regional association plots for suggestively significant loci in the HCHS/SOL WHRadjBMI sexes-combined analysis. The plots appear in chromosome:position order. Dot color reflects  $R^2$  calculated from the 1000 Genomes AMR reference dataset. Point symbols represent variant functional classifications: a) rs13301996, *CDK5RAP2*; b) rs115981023, *TAOK3*; c) rs185566196, *KIAA0391*; d) rs116612483, *CDH4*.

**Supplementary Figure 21. QQ Plots.** QQ Plots for HIPadjBMI, including sexes-combined (black), women-only (orange), men-only (blue).

**Supplementary Figure 22. Generalization of Known WHRadjBMI Loci.** Comparison of the effect size estimates of known loci associated with WHRadjBMI in the sexes-combined analysis for GIANT (Shungin et al. 2015), all-ancestry GWAS, and the HCHS/SOL. Estimates are shown for all lead-gen SNPs with r-value < 0.1. Lead-gen SNPs are the SNPs with smallest r-value in a known locus. Loci were defined as regions of 1MB. Generalized SNPs (r-value<0.05) are highlighted in blue and non-generalized SNPs are highlighted in red.

**Supplementary Figure 23. Generalization of Known WHRadjBMI Loci.** Comparison of the effect size estimates of known loci associated with WHRadjBMI in the women-only analysis for GIANT (Shungin et al. 2015), all-ancestry GWAS, and the HCHS/SOL women-only analysis. Estimates are shown for all lead-gen SNPs with r-value < 0.1. Lead-gen SNPs are the SNPs with smallest r-value in a known locus. Loci were defined as regions of 1MB. Generalized SNPs (r-value < 0.05) are highlighted in blue and non-generalized SNPs are highlighted in red.

**Supplementary Figure 24. Generalization of Known WHRadjBMI Loci.** Comparison of the effect size estimates of known loci associated with WHRadjBMI in the men-only analysis for GIANT (Shungin et al. 2015), all-ancestry GWAS, and the HCHS/SOL men-only analysis. Estimates are shown for all lead-gen SNPs with r-value <0.1. Lead-gen SNPs are the SNPs with smallest r-value in a known locus. Loci were defined as regions of 1MB. Generalized SNPs (r-value<0.05) are highlighted in blue and non-generalized SNPs are highlighted in red.

**Supplementary Figure 25. Generalization of Known WCadjBMI Loci.** Comparison of the effect size estimates of known loci associated with WCadjBMI in the sexes-combined analysis for GIANT (Shungin et al. 2015), all-ancestry GWAS, and the HCHS/SOL sexes-combined analysis. Estimates are shown for all lead-gen SNPs with r-value < 0.1. Lead-gen SNPs are the SNPs with smallest r-value in a known locus. Loci were defined as regions of 1MB. Generalized SNPs (r-value < 0.05) are highlighted in blue and non-generalized SNPs are highlighted in red.

**Supplementary Figure 26. Generalization of Known WCadjBMI Loci.** Comparison of the effect size estimates of known loci associated with WCadjBMI in the women-only analysis for GIANT (Shungin et al. 2015), all-ancestry GWAS, and the HCHS/SOL women-only analysis. Estimates are shown for all lead-gen SNPs with r-value < 0.1. Lead-gen SNPs are the SNPs with smallest r-value in a known locus. Loci were defined as regions of 1MB. Generalized SNPs (r-value < 0.05) are highlighted in blue and non-generalized SNPs are highlighted in red.

**Supplementary Figure 27. Generalization of Known WCadjBMI Loci.** Comparison of the effect size estimates of known loci associated with WCadjBMI in the men-only analysis for GIANT (Shungin et al. 2015), all-ancestry GWAS, and the HCHS/SOL men-only analysis. Estimates are shown for all lead-gen SNPs with r-value <0.1. Lead-gen SNPs are the SNPs with smallest r-value in a known locus. Loci were defined as regions of 1MB. Generalized SNPs (r-value<0.05) are highlighted in blue and non-generalized SNPs are highlighted in red.

**Supplementary Figure 28. Generalization of Known HIPadjBMI Loci.** Comparison of the effect size estimates of known loci associated with HIPadjBMI in the sexes-combined analysis for GIANT (Shungin et al. 2015), all-ancestry GWAS, and the HCHS/SOL sexes-combined analysis. Estimates are shown for all lead-gen SNPs with r-value < 0.1. Lead-gen SNPs are the SNPs with smallest r-value in a known locus. Loci were defined as regions of 1MB. Generalized SNPs (r-value < 0.05) are highlighted in blue and non-generalized SNPs are highlighted in red.

**Supplementary Figure 29. Generalization of Known HIPadjBMI Loci.** Comparison of the effect size estimates of known loci associated with HIPadjBMI in the women-only analysis for GIANT (Shungin et al. 2015), all-ancestry GWAS, and the HCHS/SOL women-only analysis. Estimates are shown for all lead-gen SNPs with r-value <0.1. Lead-gen SNPs are the SNPs with smallest r-value in a known locus. Loci were defined as regions of 1MB. Generalized SNPs (r-value<0.05) are highlighted in blue and non-generalized SNPs are highlighted in red.

**Supplementary Figure 30. Generalization of Known HIPadjBMI Loci.** Comparison of the effect size estimates of known loci associated with HIPadjBMI in the men-only analysis for GIANT (Shungin et al. 2015), all-ancestry GWAS, and the HCHS/SOL men-only analysis. Estimates are shown for all lead-gen SNPs with r-value <0.1. Lead-gen SNPs are the SNPs with smallest r-value in a known locus. Loci were defined as regions of 1MB. Generalized SNPs (r-value<0.05) are highlighted in blue and non-generalized SNPs are highlighted in red.

**Supplementary Table 1.** Study-specific descriptive statistics for discovery and replication cohorts. Abbreviations: WC - waist circumference; HIP - hip circumference; WHR - waist-to-hip ratio; BMI - body mass index.
