

Supplemental material

Supplemental Figure 1. Signal to cut off ratio (S/Co) by calendar month April (4) until September (9). Red lines represent thresholds. Abbott-NP (1.4) (n=54 positive) based on the manufacture's recommendations. Spike (0.190) (n=228 positive); RBD (0.186) (n=104 positive); and NP (0.396) (n=214 positive). Abbott- Architect SARS-Cov-2 IgG assay which targets the nucleocapsid antigen and three in-house IgG ELISA chemiluminescent assays recognizing distinct recombinant viral antigens: full length spike glycoprotein (Spike), spike glycoprotein receptor binding domain (RBD), and nucleocapsid (NP).
