Working During the COVID-19 Pandemic: The CAPTURE Survey

Characterizing Awareness of SARS-CoV-2 PrevenTion and Understanding Responses and Experiences

Thank you for your willingness to complete this survey! It should take no longer than 20 minutes to complete. As you will see, some questions are personal in nature, and others assess work-

related behaviors as they relate to the current coronavirus disease-19 (**COVID-19**) pandemic. Severe acute respiratory syndrome coronavirus 2 (**SARS-CoV-2**), the virus causing COVID-19, refers to the illness caused by the novel coronavirus that was first identified in 2019.

We realize there are many different opinions on both the severity of, and responses to, the pandemic. Please know that **your answers to these questions are strictly confidential** and study results will only be presented in summary form. With that, we ask you to be honest in your responses.

When answering these questions, please only think about your work at [Company].

We very much appreciate your time and honesty.

If you have any questions while taking this study, please email the study coordinator.
