

Effect of kettlebell training on bone mineral density in two older adults with osteoporosis: a multiple-case study from the BELL trial.

Australian New Zealand Clinical Trials Registry (ID: [ACTRN12619001177145](https://www.anzctr.org.au/Trial/Registration/TrialRegistration.aspx?ACTRN12619001177145)).

CARE (CAsE REport) guidelines

Item name	Item	Brief description	Addressed on page number/ heading
Title	1	The words “case report” (or “case study”) should appear in the title along with phenomenon of greatest interest (e.g., symptom, diagnosis, test, intervention)	p1
Key words	2	The key elements of this case in 2-5 words	p1
Abstract	3	a) Introduction - What does this case add? b) Case Presentation: <ul style="list-style-type: none"> The main symptoms of the patient The main clinical findings The main diagnoses and interventions The main outcomes c) Conclusion - What were the main “take-away” lessons from this case?	p1
Introduction	4	Brief background summary of this case referencing the relevant medical literature	p1-2
Participant information	5	a) Demographic information (e.g., age, gender, ethnicity, occupation) b) Main symptoms of the patient (his or her chief complaints) c) Medical, family, and psychosocial history - including diet, lifestyle, and genetic information whenever possible, and details about relevant comorbidities including past interventions and their outcomes	p2 n/a p2
Clinical findings	6	Describe the relevant physical examination (PE) findings	p5
Timeline	7	Depict important dates and times in this case (table or figure)	p4-5
Diagnostic assessment	8	a) Diagnostic methods (e.g., PE, laboratory testing, imaging, questionnaires) b) Diagnostic challenges (e.g., financial, language/cultural) c) Diagnostic reasoning including other diagnoses considered d) Prognostic characteristics (e.g., staging) where applicable	p5 n/a n/a n/a
Therapeutic intervention	9	a) Types of intervention (e.g., pharmacologic, surgical, preventive, self-care) <ul style="list-style-type: none"> Administration of intervention (e.g., dosage, strength, duration) Changes in intervention (with rationale) 	p3-4
Follow-up and outcomes	10	a) Summarize the clinical course of all follow-up visits including <ul style="list-style-type: none"> Clinician and patient-assessed outcomes Important follow-up test results (positive or negative) Intervention adherence and tolerability (and how this was assessed) Adverse and unanticipated events 	p5

Item name	Item	Brief description	Addressed on page number/ heading
Discussion	11	a) The strengths and limitations of the management of this case b) The relevant medical literature c) The rationale for conclusions (including assessments of cause and effect) d) The main “take-away” lessons of this case report	p8 p6-8 p7-8
Participant perspective	12	The patient should share his or her perspective or experience whenever possible	n/a
Informed consent	13	Did the patient give informed consent? Please provide if requested	Yes, p2
