### Questions from the 2022 American Life Survey that supplied data for this study

For questions that presented a series of items for separate consideration, such as the third question below, all those items are listed, even though not all were used in this analysis.

Response options are presented here in order from negative to positive (e.g., “not important” to “extremely important”). Respondents were randomized 1:1 to receive responses in that order or the reverse.

In the list below, questions or items that were repeated or adapted from prior surveys contain citations to those surveys.

Expected counts for 2020 to 2022 were obtained by fitting an ARIMA model to data for January 2007 through December 2019.

Figure S2. Justifiability of use or force or violence to achieve specific political objectives

Respondents (n= 8,620) were asked, “What do you think about the use of force or violence in the following situations?” with response options always/usually/sometimes/never justified.
