Table S4: Adapted EPHPP

Adaptations of the Quality assessment tool for quantitative studies of the Effective Public Health Practice Project (EPHPP)

Component	Question	Adaptation
A) Selection Bias	<p>(Q1) Are the individuals selected to participate in the study likely to be representative of the target population?</p> <p>Very likely Somewhat likely Not likely Can't tell</p> <p>(Q2) What percentage of selected individuals agreed to participate (survey study) or were included in the sample selection (register study)?</p> <p>80 - 100% agreement 60 - 79% agreement less than 60% agreement Not applicable Can't tell</p>	No adaptation
B) Study Design	<p>Indicate the study design</p> <ol style="list-style-type: none"> 1 Randomized controlled trial 2 Controlled clinical trial 3 Cohort analytic (two group pre + post) 4 Case-control 5 Cohort (one group pre + post (before and after)) 6 Interrupted time series 7 Other specify _____ 8 Can't tell <p>Was the study described as randomized? If NO, go to Component C.</p> <p>No Yes</p> <p>If Yes, was the method of randomization described? (See dictionary)</p> <p>No Yes</p> <p>If Yes, was the method appropriate? (See dictionary)</p> <p>No Yes</p>	<p>(Q1) Indicate the study design</p> <p>➔ Study designs adjusted for natural experiment studies as follows:</p> <ul style="list-style-type: none"> • Cohort analytic (two groups pre + post) • Cohort (one group pre + post) • Cross-sectional case-control • Cross-sectional • Repeated cross-sectional • Interrupted time series • Ecological study • Other specify _____ • Can't tell <p>The three questions about randomization were summarised:</p> <p>➔ Adjusted as follows:</p> <p>(Q2) Were there any limitations in the random allocation of participants to the exposure through the natural experiment?</p> <p>Answer options:</p> <p>No limitations Few limitations Several limitations Can't tell</p>
C) Confounders	<p>(Q1) Were there important differences between groups prior to the intervention?</p> <p>Yes No Can't tell</p> <p>The following are examples of confounders:</p> <p>Race Sex Marital status/family Age SES (income or class) Education Health status Pre-intervention score on outcome measure</p> <p>(Q2) If yes, indicate the percentage of relevant confounders that were controlled (either in the design (e.g. stratification, matching) or analysis)?</p> <p>80 - 100% (most) 60 - 79% (some) Less than 60% (few or none) Can't Tell</p>	No adaptation
D) Blinding	<p>(Q1) Was (were) the outcome assessor(s) aware of the intervention or exposure status of participants?</p> <ol style="list-style-type: none"> 1 Yes 2 No 3 Can't tell 	Component deleted, not applicable.

	<p><i>(Q2) Were the study participants aware of the research question?</i></p> <p>1 Yes 2 No 3 Can't tell</p>	
E) Data Collection Methods	<p><i>(Q1) Were data collection tools shown to be valid?</i></p> <p>Yes No Can't tell</p> <p><i>(Q2) Were data collection tools shown to be reliable?</i></p> <p>Yes No Can't tell</p>	No adaptation
F) Withdrawals and Drop-outs	<p><i>(Q1) Were withdrawals and drop-outs reported in terms of numbers and/or reasons per group?</i></p> <p>Yes No Can't tell Not Applicable (i.e. one time surveys or interviews)</p> <p><i>(Q2) Indicate the percentage of participants completing the study. (If the percentage differs by groups, record the lowest).</i></p> <p>80 - 100% 60 - 79% less than 60% Can't tell Not Applicable (i.e. Retrospective case-control)</p>	No adaptation, however hint for reviewers: <i>Only applicable for longitudinal studies and refers to the drop-outs during follow-up. Adherence to treatment should be captured in the "intervention integrity" section below.</i>
G) Intervention Integrity	<p><i>(Q1) What percentage of participants received the allocated intervention or exposure of interest?</i></p> <p>1 80 - 100% 2 60 - 79% 3 less than 60% 4 Can't tell</p> <p><i>(Q2) Was the consistency of the intervention measured?</i></p> <p>1 Yes 2 No 3 Can't tell</p> <p><i>(Q3) Is it likely that subjects received an unintended intervention (contamination or co-intervention) that may influence the results?</i></p> <p>4 Yes 5 No 6 Can't tell</p>	No adaptation
H) Analyses	<p><i>(Q1) Indicate the unit of allocation (circle one)</i></p> <p>community organization/institution practice/office individual</p> <p><i>(Q2) Indicate the unit of analysis (circle one)</i></p> <p>community organization/institution practice/office individual</p> <p><i>(Q3) Are the statistical methods appropriate for the study design?</i></p> <p>1 Yes 2 No 3 Can't tell</p> <p><i>(Q4) Is the analysis performed by intervention allocation status (i.e. intention to treat) rather than the actual intervention received?</i></p> <p>1 Yes 2 No 3 Can't tell</p>	No adaptation

Table S6: Additional details of included studies

Author & Year of publication	Title	Event giving rise to natural experiment	Country of study	Geographical level	total sample size	% of sample migrants	Type of study	Statistical methods*	Causal pathways considered (theoretical/ empirical)	Using migrants as an example for wider issues
Almquist & Miething 2022	The impact of an unemployment insurance reform on incidence rates of hospitalisation due to alcohol-related disorders: a quasi-experimental study of heterogeneous effects across ethnic background, educational level, employment status, and sex in Sweden	social policy (restriction of health insurance policy)	Sweden	country	5009832	25%	repeated cross-sectional	Regression discontinuity	Theoretical: compensation of income loss, investment in health-promoting goods and activities Empirical: none	migrants as relevant subgroup (-> axis of marginalisation)
Black et al. 2015	The Impact of the Great Migration on Mortality of African Americans: Evidence from the Deep South	geographical proximity to facilitator of migration	United States of America	country	828179	not reported	cohort analytic	Instrumental variable Intention-to-treat	Theoretical: move from rural to urban areas Empirical: evidence for increased smoking and drinking affecting rates of COPD, cirrhosis, chronic liver disease and cancer	migrant-specific
Boje-Kovacs et al. 2022	Neighborhoods and mental health – evidence from a natural experiment in the public social housing sector	social policy (housing programme)	Denmark	regional (Copenhagen municipality)	8175	47%	cohort analytic	Instrumental variable Intention-to-treat	Theoretical: mental health affected by social interactions; mental health affected by structural or institutional factors. Empirical: structural factors (housing quality, local area, health care fixed effects)	migrants as relevant subgroup (-> axis of marginalisation)
Bozorgmehr & Razum 2015	Effect of Restricting Access to Health Care on Health Expenditures among Asylum-Seekers and Refugees: A Quasi-Experimental Study in Germany, 1994–2013	healthcare access policy	Germany	country	5 688 823 person-years	100%	ecological cross-sectional study; ecological cohort analytic	Regression adjustment; Regression discontinuity Intention-to-treat	Theoretical: entitlement restrictions prevent cheaper primary care and increase costly emergency care; negative health effects of collective accommodation centres Empirical: higher costs in collective accommodation centres	migrant-specific research question, but results may be extrapolated (-> effect of restrictions)
East & Friedman 2020	An Apple a Day? Adult food stamp eligibility and health care utilization among immigrants	social policy (food stamps)	USA	country	11674	100%	cohort analytic	Difference in differences Intention-to-treat	Theoretical: increased food consumption, household resources Empirical: affordability of care (no effect)	migrants as example
East 2020	The Effect of Food Stamps on Children's Health - Evidence from Immigrants' Changing Eligibility	social policy (food stamps)	USA	country	5949	100%	cohort analytic	Difference in differences Intention-to-treat	Theoretical: increased food consumption, improved nutritional content, child care & family stress, life-course effects from nutrition in utero and infant age Empirical: increased food consumption, life-course	migrants as example

									effects from nutrition in utero and infant age	
Erdmann et al. 2021	Using independent cross-sectional survey data to predict post-migration health trajectories among refugees by estimating transition probabilities and their variances	migration policy (residential assignment)	Germany	regional (federal state)	560	100%	repeated cross-sectional used to approximate longitudinal design	Transition probabilities	Theoretical: differing levels of noise and chemical pollution, connectivity and access to green spaces, infrastructure development, social connectivity, and accessibility of health care services Empirical: none	migrants as example
Fletcher	The effects of foreign-born peers in US High Schools and Middle Schools	variation across grades within schools	USA	country	78546	10%	cross-sectional study, cohort analytic	Regression adjustment	Theoretical: fewer risk behaviours, better health behaviours fewer behavioural problems among foreign-born students; Social ties to US-born as form of upward mobility; insulation through foreign-born; US-born increasing discrimination and harassment Empirical: friendship networks (less risky behaviours among foreign-born peers), positive effects largest in small groups	migrant-specific
Foverskov et al. 2022a	Neighbourhood socioeconomic disadvantage and psychiatric disorders among refugees: a population-based, quasi-experimental study in Denmark	migration policy (residential assignment)	Denmark	country	42067	100%	cohort analytic	regression adjustment intention-to-treat	Theoretical: exposure to neighbourhood disorder, crime, noise, and lack of amenities; lack of social support and cohesion Empirical: none	migrant-specific research question, but results may be extrapolated (-> effect of neighbourhood disadvantage)
Foverskov et al. 2022b	Risk of Psychiatric Disorders Among Refugee Children and Adolescents Living in Disadvantaged Neighborhoods	migration policy (residential assignment)	Denmark	country	18709	100%	cohort analytic	regression adjustment intention-to-treat	Theoretical: socioeconomic opportunities, health behaviours, social support, and collective efficacy Empirical: none	migrant-specific research question, but results may be extrapolated (-> effect of neighbourhood disadvantage)
Frey	Getting under the Skin: The Impact of Terrorist Attacks on Native and Immigrant Sentiment	terrorist attack	Germany	country	1033	100%	cross-sectional study	Regression adjustment	Theoretical: increase in anti-refugee sentiment, hostility & discrimination Empirical: increase in anti-refugee sentiment, hostility & discrimination	migrants as example
Fu & VanLandingham 2012a	Mental Health Consequences of International Migration for Vietnamese Americans and the Mediating Effects of Physical Health and Social Networks: Results from a Natural Experiment Approach	migration policy (repatriation)	Vietnam/ USA	city	703	18%	cohort analytic	Regression adjustment	Theoretical: acculturation. Incl. The acquisition of dietary patterns and a more sedentary lifestyle; psychological stresses associated with immigration (suggested protective factor language acquisition)	migrant-specific

									Empirical: negative effect of acculturation, positive effect of language acquisition	
Fu & VanLandingham 2012b	Disentangling the Effects of Migration, Selection and Acculturation on Weight and Body Fat Distribution: Results from a Natural Experiment involving Vietnamese Americans, Returnees, and Never-leavers	migration policy (repatriation)	Vietnam/ USA	city	709	18%	cohort analytic	Regression adjustment Mediation analysis via Structural Equation Modelling	Theoretical: disruption/strengthening of social networks, physical health Empirical: social networks and physical health buffer negative effects of migration	migrant-specific
Fu & VanLandingham 2010	Mental and Physical Health Consequences of Repatriation for Vietnamese Returnees: A Natural Experiment Approach	migration policy (repatriation)	Vietnam/ USA	city	709	18%	cohort analytic	Regression adjustment	Theoretical: predisposing factors, migration experience, physical and social environment after migration Empirical: length of stay in asylum camps, length of time back in Vietnam, number of communities lived in since returning, community reaction to return	migrant-specific
Giacco et al. 2018	The same or different psychiatrists for in- and out-patient treatment? A multi-country natural experiment	healthcare/ service organisation	Belgium, England, Germany, Italy and Poland	hospital	6369	14%	cohort analytic	Regression adjustment Intention-to-treat	Theoretical: fragmentation of specialisation Empirical: none	migrants as relevant subgroup (-> axis of marginalisation)
Gibson et al. 2010	What happens to diet and child health when migration splits households? Evidence from a migration lottery program	migration policy (visa programme)	New Zealand, Tonga	country	669	27%	cohort analytic	Instrumental variable	Theoretical: lower income, changes income composition & household size; relative prices of different foods in destination and home country Empirical: dietary change in children left behind dependent on lower income rather than change in household size or income composition	migrant-specific
Gibson et al. 2013	Natural Experiment evidence on the effect of Migration on blood pressure and Hypertension	migration policy (visa programme)	New Zealand, Tonga	country	638	25%	cohort analytic	Instrumental variable	Theoretical: hypertension triggered by anxiety and change in diet (esp. Sodium)/ physical activity Empirical: increased hypertension through stress and sodium	migrant-specific
Grönqvist et al. 2012	Income inequality and health: Lessons from a refugee residential assignment program	migration policy (residential assignment)	Sweden	country	65595	100%	cohort analytic	Regression adjustment	Theoretical: strong vs. weak income inequality hypothesis Empirical: none	migrants as example
Hainmueller et al. 2017	Protecting unauthorized immigrant mothers improves their children's mental health	migration policy (visa programme)	USA	regional (Oregon)	5653	100%	cohort analytic	Regression discontinuity	Theoretical: reduced threat of deportation Empirical: none	migrant-specific

								Intention- to-treat		
Hajdu & Hajdu 2015	The Impact of Culture on Well-Being: Evidence from a Natural Experiment	international migration	34 European countries for at least one round and 16 countries for all five rounds	Continental (Multiple European countries)	12085	100%	cross-sectional study	Regression adjustment	Theoretical: individualism/collectivism, interpersonal and institutional trust Empirical: none	migrants as example
Hamad et al. 2020	Association of Neighborhood Disadvantage with Cardiovascular Risk Factors and Events Among Refugees in Denmark	migration policy (residential assignment)	Denmark	municipalities/ parishes	49305	100%	cohort analytic	Regression adjustment	Theoretical: limited walkability, availability of nutritious food, reduced employment opportunities, greater crime rates Empirical: none	migrants as example
Hamilton et al. 2021	DACA's Association With Birth Outcomes Among Mexican-Origin Mothers in the United States	migration policy (visa programme)	USA	country	72613	100%	cohort analytic	Difference in differences Intention-to-treat	Theoretical: reduced threat of deportation, provision of economic opportunity Empirical: none	migrant-specific
Honkaniemi et al. 2021	Psychiatric consequences of a father's leave policy by nativity: a quasi-experimental study in Sweden	social policy (parental leave)	Sweden	country	198589	17%	cohort analytic	Regression discontinuity Intention-to-treat	Theoretical: biological (ie, hormonal) changes, psychosocial changes, work-family balance, family relationships, physical activity, decreased alcohol consumption Empirical: none	migrants as relevant subgroup (-> axis of marginalisation)
Hori & Schafer 2010	Social costs of displacement in Louisiana after Hurricanes Katrina and Rita	natural disaster	USA	regional	10347	19%	cross-sectional study	Regression adjustment	Theoretical: disruption of social and economic networks Empirical: none	migrant-specific
Hwang et al. 2011	The Short-Term Impact of Involuntary Migration in China's Three Gorges: A Prospective Study	infrastructure development	China	regional	770	55%	cohort analytic	Difference in differences	Theoretical: dismantling of social networks and economic circumstances Empirical: none	migrant-specific
Jaschke & Kosyakova 2021	Does facilitated and Early Access to the Healthcare System Improve Refugees' Health Outcomes? Evidence from a Natural Experiment in Germany	healthcare access policy	Germany	country	5922	100%	cross-sectional study; cohort analytic	Regression adjustment Intention-to-treat	Theoretical: practical hurdles of visiting a doctor, undiagnosed mental health issues during flight Empirical: literacy (worse score without eHC access), post-migration stress act as moderators	migrant-specific research question, but results may be extrapolated (-> effect of restrictions)
Juanmarti Mestres et al. 2020	The deadly effects of losing health insurance	migration policy (restricted)	Spain	country	not reported	not reported	ecological cohort analytic	Difference in differences	Theoretical: treatment interruptions, lower diagnosis rates, no access to timely	migrant-specific research question, but results may be

		health care access)						Intention-to-treat	treatment Empirical: none	extrapolated (-> effect of restrictions)
Kaushal 2007	Do food stamps cause obesity? Evidence from immigrant experience	social policy (food stamps)	USA	country	489266	15%	cohort analytic	Difference in differences Intention-to-treat	Theoretical: could cause obesity if people would buy less food if they received cash, but food stamps might also lead to healthier food and lower stress Empirical: none	migrants as example
Lopez et al. 2016	Health Implications of an Immigration Raid: Findings from a Latino Community in the Midwestern United States	migration policy (migration enforcement)	USA	regional	487	83%	cross-sectional study	Regression adjustment	Theoretical: community distrust in authorities, perception of public spaces as risky Empirical: none	migrant-specific
Lu et al. 2022	Heterogeneous Impact of Social Integration on the Health of Rural-to-Urban Migrants in China	variation in dialects	China	country	117446	100%	cross-sectional study	Instrumental variable	Theoretical: changed health consciousness or behaviour, increased utilisation of health services Empirical: none	migrant-specific
Mezuk et al. 2019	Immigrant enclaves and risk of drug involvement among asylum-seeking immigrants in Sweden: A quasi-experimental study	migration policy (residential assignment)	Sweden	country	1091328	5%	cohort analytic	Regression adjustment	Theoretical: strengthened social capital in areas of high migrant density and stability of social environments act as protective factors Empirical: none	migrants as example
Raphael et al. 2020	Neighborhood Deprivation and Mental Health Among Immigrants to Sweden	migration policy (residential assignment)	Sweden	country	145310	33%	cohort analytic	Regression adjustment	Theoretical: Discrimination and fewer opportunities for integration, financial stability Empirical: neighbourhood percent immigrants	migrants as example
Reiss et al. 2012	Assessing the effect of regional deprivation on mortality avoiding compositional bias: a natural experiment	migration policy (residential assignment)	Germany	regional	32661	100%	cohort analytic	Regression adjustment	Theoretical: none Empirical: none	migrants as example
Schober & Zocher 2022	Health-Care Utilization of Refugees: Evidence from Austria	migration policy (residential assignment)	Austria	regional (Upper Austria)	9771	100%	cohort analytic	Regression adjustment	Theoretical: different availability of information, norms and attitudes among peers, presence of NGOs and professional support, differing regional practice styles Empirical: none	migrant-specific
Stillman et al. 2015	Miserable Migrants? Natural Experiment Evidence on International Migration and Subjective Well-Being	migration policy (visa programme)	New Zealand, Tonga	country	254	40%	cohort analytic	Instrumental variable	Theoretical: relative positions fall after migration; lower relative income leads to unhappiness Empirical: none	migrant-specific
Stillman et al. 2009	Migration and mental health: Evidence from a natural experiment	migration policy (visa programme)	New Zealand, Tonga	country	497	40%	cohort analytic	Instrumental variable	Theoretical: stressful migration process, positive impact from remittances and change of cultural setting	migrant-specific

									Empirical: changes in income and employment explain only small part of mental health improvement	
Stillman et al. 2012	The impact of immigration on child health: experimental evidence from a migration lottery program	migration policy (visa programme)	New Zealand, Tonga	country	779	22%	cohort analytic	Instrumental variable	Theoretical: negative effect of unhealthy diets and decrease in physical activity, change in antenatal practices and health knowledge Empirical: Change in consumption of meats, fats and milk, change in household composition; changes in income of limited importance	migrant-specific
Swartz et al. 2017	Expanding Prenatal Care to Unauthorized Immigrant Women and the Effects on Infant Health	social policy (rollout of health insurance policy)	USA	regional (Oregon)	213746	22%	cohort analytic	Difference in differences Intention-to-treat	Theoretical: direct effect, child health outcomes affected through healthcare utilisation of mother Empirical: none	migrant-specific research question, but results may be extrapolated (-> effect of restrictions)
Toomey et al. 2014	Impact of Arizona's SB 1070 Immigration Law on Utilization of Health Care and Public Assistance Among Mexican-Origin Adolescent Mothers and Their Mother Figures	migration policy (migration enforcement)	USA	city	279	54%	cohort study	Regression adjustment	Theoretical: social stress theory (disadvantage exposes individuals to more stressful events) Empirical: none	migrant-specific
Torres et al. 2022	The Deferred Action for Childhood Arrivals program and birth outcomes in California: a quasi-experimental study	migration policy (visa programme)	USA	regional (California)	57476	100%	cohort analytic	Difference in differences	Theoretical: improved employment, psychological wellbeing including reduced stress related to deportation, expanded access to healthcare Empirical: none	migrant-specific
Venkataramani et al. 2017	Health consequences of the US Deferred Action for Childhood Arrivals (DACA) immigration programme: a quasi-experimental study	migration policy (visa programme)	United States of America	country	14973	100%	cohort analytic	Difference in differences Intention-to-treat	Theoretical: increased employment opportunities and income, raised future aspirations, eliminating risk of deportation Empirical: none	migrant-specific
Wenner et al. 2020	Differences in realized access to healthcare among newly arrived refugees in Germany: results from a natural quasi-experiment	healthcare access policy	Germany	regional (North-Rhine Westphalia)	55452 person-quarters	100%	ecological cohort analytic	Comparison of standardised incidence ratios Intention-to-treat	Theoretical: administrative effort, delays in referrals Empirical: none	migrant-specific research question, but results may be extrapolated (-> effect of restrictions)
Wenner et al. 2022	Inequalities in access to healthcare by local policy model among newly arrived refugees: evidence from population-based studies in two German states	healthcare access policy	Germany	country (2 regions: Berlin and Baden-Württemberg)	863	100%	cross-sectional study	Regression adjustment	Theoretical: bureaucratic barriers Empirical: none	migrant-specific research question, but results may be extrapolated (-> effect of restrictions)

White et al. 2016	Long-term Effects of Neighbourhood Deprivation on Diabetes Risk: Quasi-Experimental Evidence from a Refugee Dispersal Policy in Sweden	migration policy (residential assignment)	Sweden	country	61386	100%	cohort analytic	Regression adjustment	Theoretical: lower purchasing power, reduced psychosocial resources, poorer food availability and walkability Empirical: accumulation of effect consistent with abovementioned pathways	migrants as example
Worth 1963	Urbanization and squatter resettlement as related to child health in Hong Kong	migration policy (residential assignment)	China	regional	405	100%	cross-sectional study	Descriptive statistics	Theoretical: overcrowding, sanitation Empirical: none	migrant-specific (results may be extrapolated?)
Ye & Rodriguez 2021	Highly vulnerable communities and the Affordable Care Act: Health insurance coverage effects, 2010–2018	healthcare access policy	USA	country	2927402	28%	cohort analytic	Difference in differences; Propensity score matching	Theoretical: protection against chronic conditions Empirical: none	migrants as relevant subgroup (-> axis of marginalisation)

* According to classification by Craig and colleagues (2)
