

Supplementary Materials

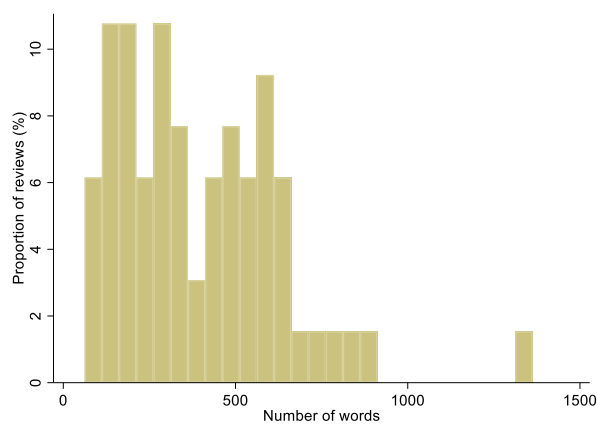

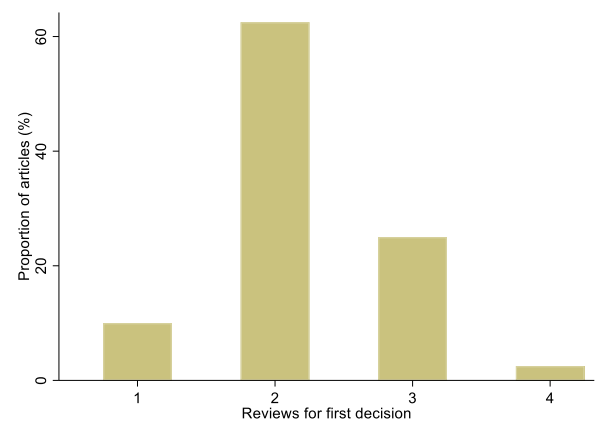

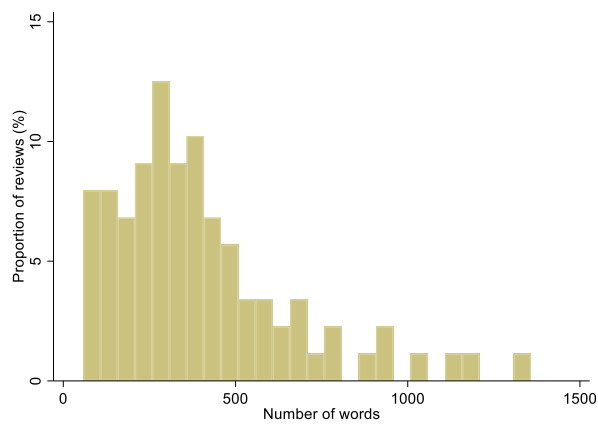

Figure S1: Distribution of the number of words per peer review and the number of peer reviews per research article by journal

The distribution of word counts per peer review (left column of panels) and reviews per research article (right column of panels) are shown for BMC Medicine (green), The BMJ (blue), and PLOS Medicine (purple) from 2003-2020. Reviews with over 1500 words were excluded.

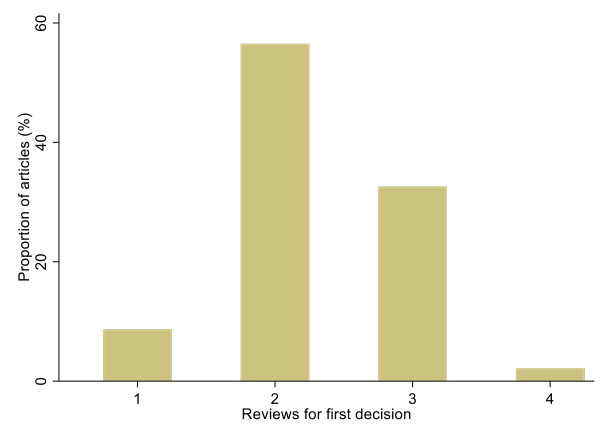

2003-2004

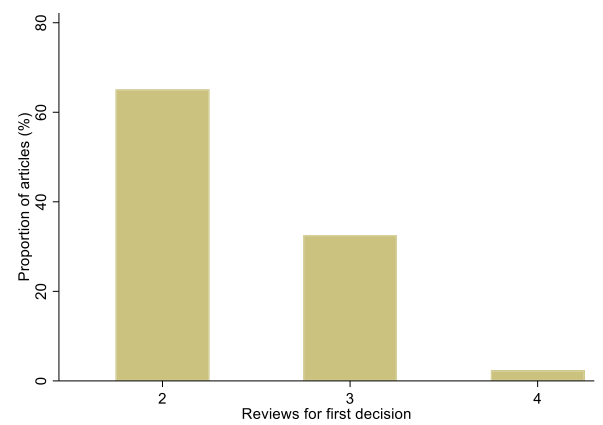

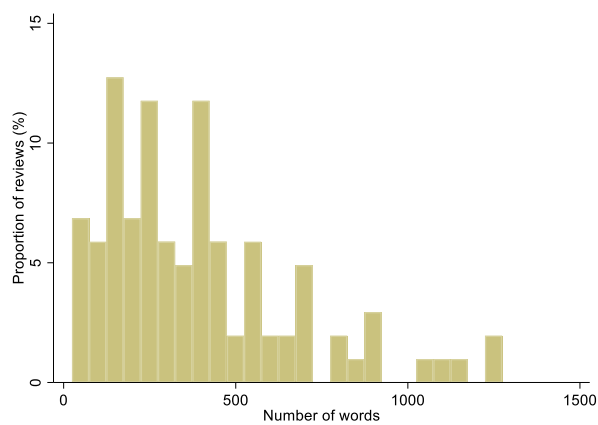

2005-2006

2007-2008

2009-2010

2011-2012

2013-2014

Figure S2: Distribution of the number of words per peer review and the number of peer reviews per research article for BMC Medicine between 2003-2014.

Reviews with over 1500 words were excluded.

2015-2016

2017-2018

Figure S3: Distribution of the number of words per peer review and the number of peer reviews per research article for BMC Medicine and The BMJ between 2015-2018.

Reviews with over 1500 words were excluded.

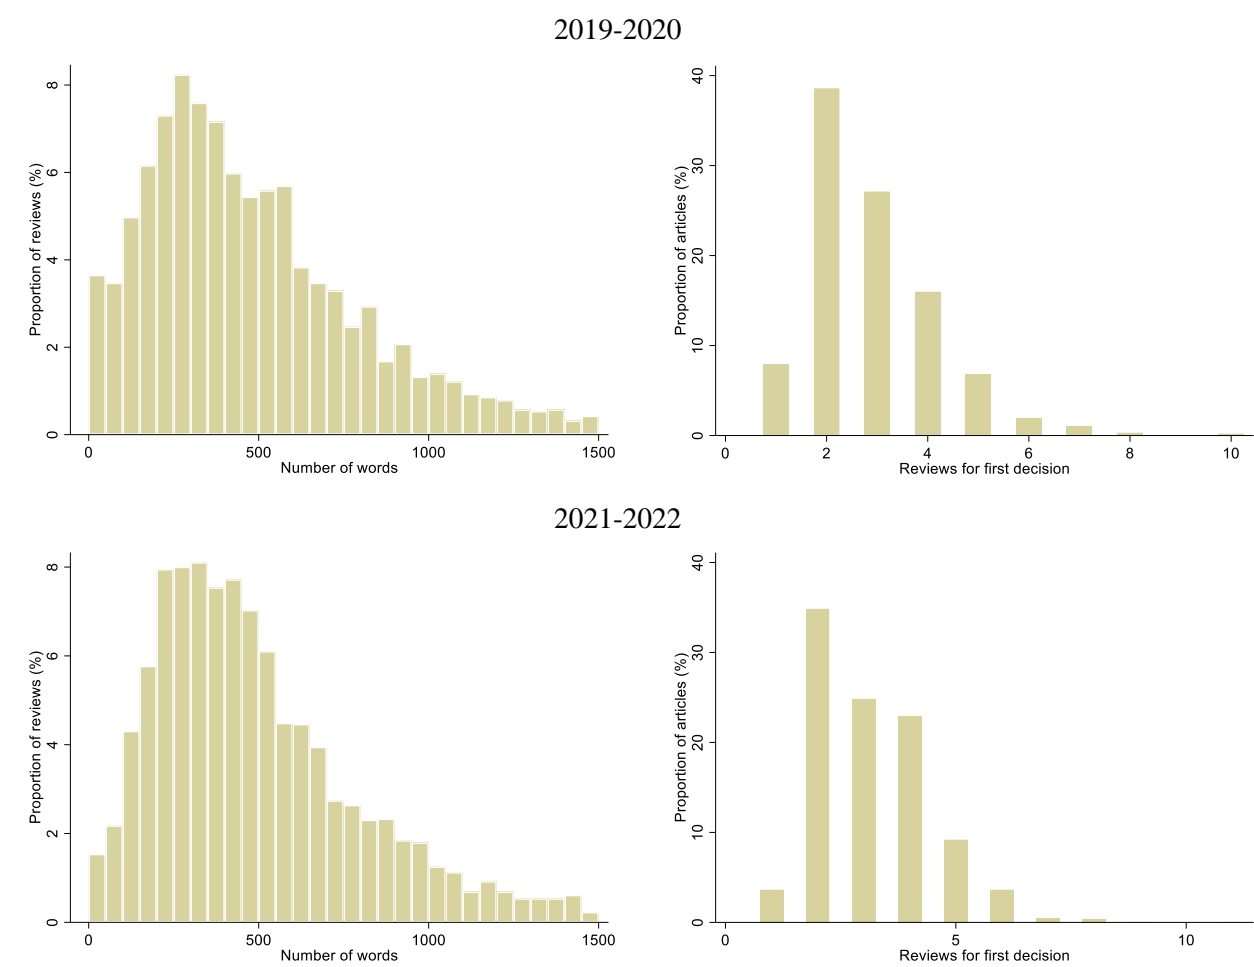

Figure S4: Distribution of the number of words per peer review and the number of peer reviews per research article for BMC Medicine, The BMJ, and PLOS Medicine between 2019-2022.

Reviews with over 1500 words were excluded.

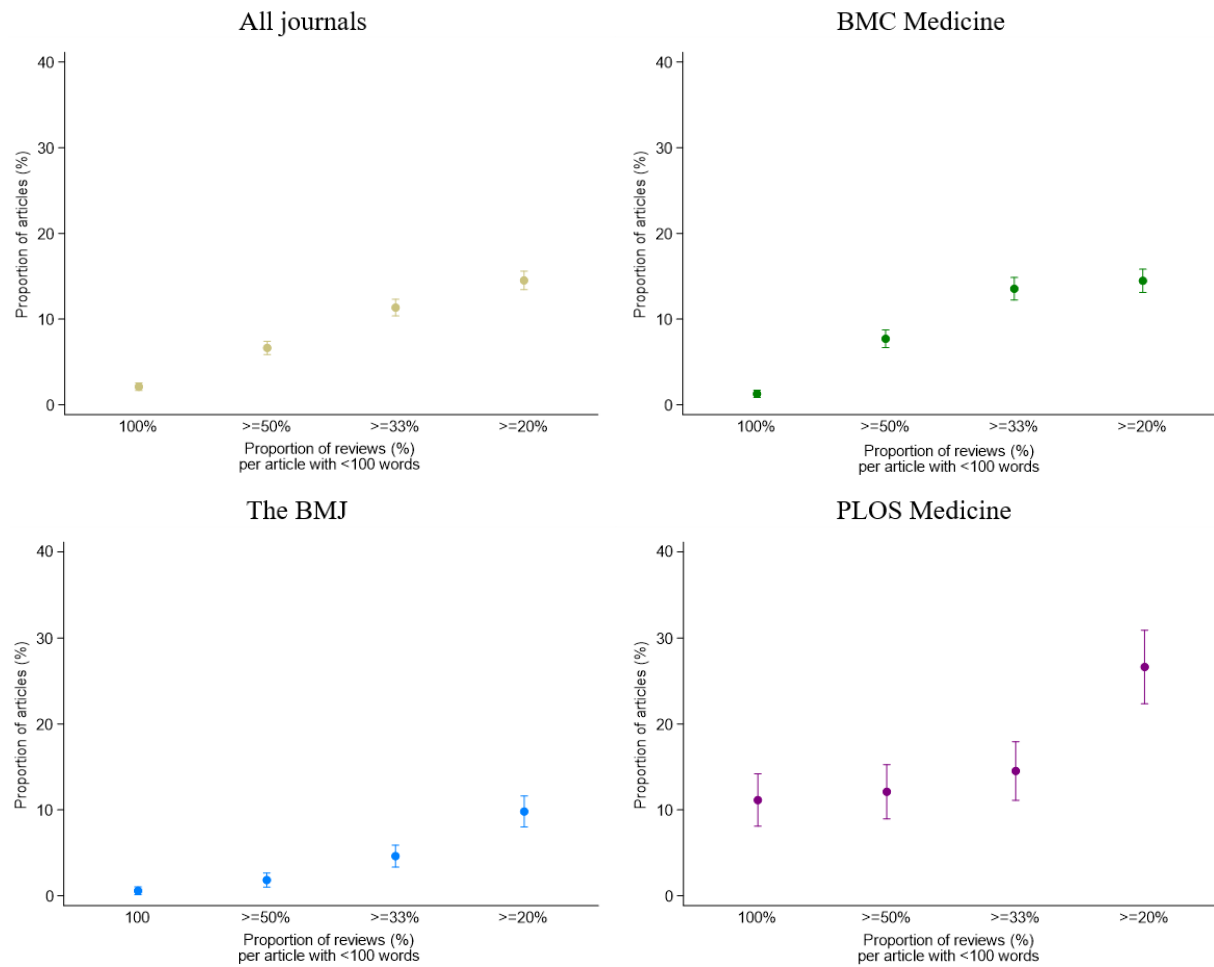

Figure S5: Proportion of articles for which the first editorial decision was made based on a set of peer reviews consisting of 100%, $\geq 50\%$, $\geq 33\%$, or $\geq 20\%$ of reviews with <100 words.

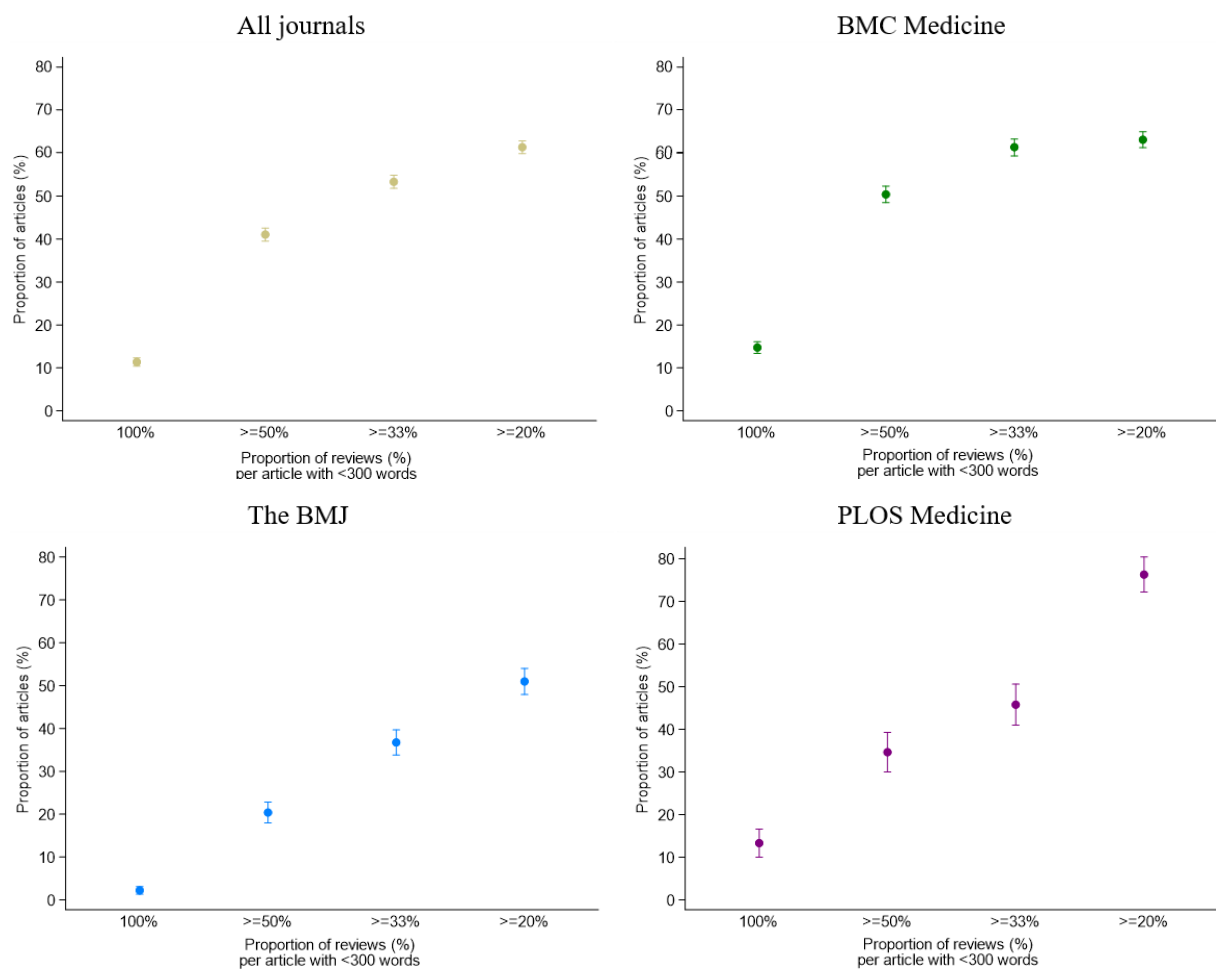

Figure S6: Proportion of articles for which the first editorial decision was made based on a set of peer reviews consisting of 100%, $\geq 50\%$, $\geq 33\%$, or $\geq 20\%$ of reviews with <300 words.
