

Supplementary Information 2a - Online Survey: Researchers and Related Staff

Start of Block: information sheet

Information sheet **PROJECT TITLE: NIHR Experiences of using Digital Tools in Clinical, Health and Social Care Research**

NAMES OF RESEARCHERS: Sophie Clohessy¹, Prof Theo Arvanitis¹, Dr Carla Toro¹, Dr Mark Elliott¹ Institute of Digital Health Care, WMG, University of Warwick)

NAME OF COLLABORATORS: Mark Evans^{2,3} Carly Craddock^{2,3} (2. The Royal Wolverhampton NHS Trust, Wolverhampton, UK, 3) National Institute for Health Research Clinical Research Network West Midlands, Birmingham, UK).

This sheet seeks to provide information, and advice, with respect to an individual's participation in support of the specified research project:

1. The study aims to investigate how online and digital tools/methods are being used for clinical, health and social care research. We are particularly interested to determine which approaches work well and which don't and use these findings to share best practice with the clinical, health and social care research community.
2. This study is funded by the National Institute of Health Research Clinical Research Network West Midlands (CRN West Midlands). The funding for this project has been awarded to Sophie Clohessy, Prof Theo Arvanitis, Dr Carla Toro, Dr Mark Elliott WMG, University of Warwick. The project will be led by The University of Warwick.
3. Participation in this research is totally voluntary, and assurances are given to the effect that no negative consequences will arise from refusal to participate in the research project.
4. Your consent for your data to be used in this questionnaire will be gained by your ticking the consent question at the end of this page, so by ticking this box you agree that your submitted data can be used in the aforementioned study.
5. Your data will be collected anonymously, therefore due to the anonymity of the data at source, once completed it is not possible for participants to withdraw their data from the study. However, you will be given the option to provide your name and contact details if you are happy

for us to contact you for further information based on your responses. Those who provide these details have the option to withdraw from the study up to 7 days after submission, by contacting Sophie Clohessy, s.clohessy@warwick.ac.uk.

6. Each individual is advised to fully consider, with others if necessary and prior to participation, any disadvantages, side effects, risks and/or discomforts that may arise from participation in this research.

7. Unless specifically agreed otherwise, all information will be held as confidential and will not be distributed outside of the research team.

8. Your data may be used as a source for future research, including research work for publication.

This research has been favourably reviewed by the University's Biomedical and Scientific Research Ethics Committee, Approval Reference: BSREC 111/20-21 dated: 17/01/2022. Dissatisfaction with the conduct of this research may be referred to the person below, who is a senior University of Warwick official entirely independent of this study: Head of Research Governance, Research & Impact Services, University House, University of Warwick, Coventry, CV4 8UW; Tel: 024 76 75733; Email: researchgovernance@warwick.ac.uk

consentform **Before you continue please understand that you are confirming your agreement with the following:**

☐ I give my consent to my data submitted within this questionnaire being used for the purposes stated above including being happy for my data to be used in future research (1)

☐ I do not consent, and I do not wish to take part (2)

Start of Block: Current use of digital tools

Use of tools

Please think about the clinical, health or social care research that you are currently working on or have worked on in the last two years. We are interested to learn whether you have used any **digital tools** during any stage of your research studies.

In this study a **digital tool** is defined as an alternative to paper based methods that is IT based or an online platform that aids any aspect of the research study (stages of clinical research include but are not limited to; set up of research studies, participant recruitment, consent, participant retention, intervention delivery, data collection, data analysis, monitoring, patient reported outcomes).

Examples of digital tools might include but are not limited to: Electronic databases for participant screening Social media platforms for participant recruitment Communication within your research team (e.g., reporting adverse events via text message or email) Electronic consent Text messaging for participant retention Digital platforms for collecting survey data

Thinking about the clinical, health or social care research studies you are currently working on or have worked over the past two years, have you used digital tools to assist in the operation, management or coordination of these studies?

- ☐ Yes (1)
- ☐ No (2)
- ☐ I have delegated digital tool use to colleagues (3)

Display This Question:

If Please think about the clinical, health or social care research that you are currently working on... = I have delegated digital tool use to colleagues

Q238 Thank you for your interest in our survey. Please forward the link of this survey to a relevant team member.

Display This Question:

If Please think about the clinical, health or social care research that you are currently working on... = No

If not used digital

What barriers have you encountered that have prevented you using digital tools in your clinical, health or social care research? Please select all answer/s that apply.

☐

Lack of budget (1)

☐

Stick to what worked in the past (2)

☐

I wasn't aware of digital tools I could use (3)

☐

I would need training to use digital tools (4)

☐

I was concerned this would bias participant recruitment (5)

☐

Other (6) _____

Display This Question:

If Please think about the clinical, health or social care research that you are currently working on... =
No

Intentions

Please rate the following statement on a 1 - 5 scale (1 "strongly disagree") and (5 "strongly agree")

"I intend to use digital tools in future clinical, health or social care research studies"

☐ 1 Strongly disagree (1)

☐ 2 (2)

☐ 3 (3)

☐ 4 (4)

☐ 5 Strongly agree (5)

End of Block: Current use of digital tools

Start of Block: Introduction

Instructions **On the next page we will ask you some questions about you.**

End of Block: Introduction

Start of Block: Demographics

General role **What is/was your role in the most recent clinical, health or social care research you were involved with?**

- ☐ Chief Investigator (3)
 - ☐ Clinical Researcher (1)
 - ☐ Data Analyst (9)
 - ☐ Principal Investigator (2)
 - ☐ Research Manager (7)
 - ☐ Research Nurse (8)
 - ☐ Trial/Study Coordinator (4)
 - ☐ Trial/Study Data Manager (6)
 - ☐ Trial/Study Manager (5)
 - ☐ Other (please provide further details below) (1)
-

Organisation **What organisation do you work for?**

- ☐ Clinical Trials Unit (2)
 - ☐ NHS Trust (4)
 - ☐ Primary Care (3)
 - ☐ University (1)
 - ☐ Other (please provide further details below) (5)
-

Place of work **Please provide the specific place of work (optional)**

End of Block: Demographics

Start of Block: All examples

Examples **Please provide a list of digital tools you are currently using or have used in your clinical, health or social care research studies over the last two years (including those still running). You can provide as many examples as you like.**

Examples **List of digital tools used in the last two years**

Page Break

Instructions **We will now ask you some more in depth questions about two of the digital tools you provided.**

Please choose one digital tool which you believe worked MOST effectively and one you believe worked LEAST effectively, in terms of operating/managing/coordinating the research study.

Please consider your examples based on any clinical/health/social research projects you have worked on in the last 2 years (including those still running)

We will ask you a block of questions about each example. On the next page, we will ask you about your first example.

End of Block: All examples

Start of Block: Least effective tool

Intro We will now ask you a block of questions about a digital tool you have used that has worked LEAST EFFECTIVELY in terms of operating, managing or coordinating a clinical/health/social research study.

Please consider your answer based on any clinical/health/social research projects you have worked on in the last 2 years (including those still running)

Debriefing sheet

Debriefing sheet

Study title: Digitising Clinical Research

Thank you for taking part in the questionnaire-based study. Researchers Sophie Clohessy¹, Prof Theo Arvanitis¹, Dr Carla Toro¹, Dr Mark Elliott¹ carried out this study supported by collaborators Mark Evans^{2,3} Carly Craddock^{2,3}.

1) Institute of Digital Health care, WMG, University of Warwick 2) The Royal Wolverhampton NHS Trust, Wolverhampton, UK, 3) National Institute for Health Research Clinical Research Network West Midlands, Birmingham, UK).

The purpose of this study is to identify local examples of digital platforms and approaches along with any barriers that may have delayed or stopped use of any digital tools. By taking part in this study, you had the opportunity to provide your contact details. If you chose to do so, we may invite you to take part in a qualitative interview study which will ask you about your experience with digital tools/platforms in further depth. Please be reminded that all data collected will remain confidential and anonymised. As mentioned in the information sheet, please note if you only partially completed the survey, we will still use the information that you provided up to the point that you stopped the survey. The findings of this study will be written up and published in a peer reviewed journal. The data will be stored securely on University of Warwick secure shared servers (M drive) for the standard data retention period of 10 years. The only people able to access the data will be the investigators of the project; Researchers Sophie Clohessy, Professor Theo Arvanitis, Dr Carla Toro, Dr Mark Elliott (Institute Digital Healthcare, WMG, University of Warwick).

If you have questions or concerns about the study please feel free to contact Sophie Clohessy, email s.clohessy@warwick.ac.uk.

You may wish to keep a copy of this debriefing sheet for your records.

Thank you for taking your time to complete our study, we hope you enjoyed the experience.

Please click on the next page to complete the study.

Supplementary Information 2b - Online Survey: R&D Department Staff

Start of Block: information sheet

Information sheet **PROJECT TITLE: Exploring Digital Approaches within R&D Departments**

NAMES OF RESEARCHERS: Sophie Clohessy¹, Prof Theo Arvanitis¹, Dr Carla Toro¹, Dr Mark Elliott¹ (1. Institute of Digital Health care, WMG, University of Warwick)

NAMES OF COLLABORATORS: Carly Craddock^{2,3}, Mark Evans^{2,3} (2. The Royal Wolverhampton NHS Trust, Wolverhampton, UK, 3. National Institute for Health Research Clinical Research Network West Midlands, Birmingham, UK).

This sheet seeks to provide information, and advice, with respect to an individual's participation in support of the specified research project:

1. The study aims to investigate how online and digital tools/methods are being used for clinical, health and social care research. We are particularly interested to determine which approaches work well and which don't and use these findings to share best practice with the clinical, health and social care research community.
2. This study is funded by the National Institute of Health Research Clinical Research Network West Midlands (CRN West Midlands). The funding for this project has been awarded to Sophie Clohessy, Prof Theo Arvanitis, Dr Carla Toro, Dr Mark Elliott (University of Warwick). The project will be led by The University of Warwick.
3. Participation in this research is totally voluntary, and assurances are given to the effect that no negative consequences will arise from refusal to participate in the research project.
4. Your consent for your data to be used in this questionnaire will be gained by your ticking the consent question at the end of this page, so by ticking this box you agree that your submitted data can be used in the aforementioned study.
5. Your data will be collected anonymously, therefore due to the anonymity of the data at source, once completed it is not possible for participants to withdraw their data from the study. However, you will be given the option to provide your name and contact details if you are happy for us to contact you for further information based on your responses. Those who provide these details have the option to withdraw from the study up to 7 days after submission, by contacting

Sophie Clohessy, s.clohessy@warwick.ac.uk.

6. Each individual is advised to fully consider, with others if necessary and prior to participation, any disadvantages, side effects, risks and/or discomforts that may arise from participation in this research.

7. Unless specifically agreed otherwise, all information will be held as confidential and will not be distributed outside of the research team.

8. Your data may be used as a source for future research, including research work for publication.

This research has been favourably reviewed by the University's Biomedical and Scientific Research Ethics Committee, Approval Reference: BSREC 111/20-21 dated: 17/01/2022. Dissatisfaction with the conduct of this research may be referred to the person below, who is a senior University of Warwick official entirely independent of this study: Head of Research Governance, Research & Impact Services, University House, University of Warwick, Coventry, CV4 8UW; Tel: 024 76 75733; Email: researchgovernance@warwick.ac.uk

consentform **Before you continue please understand that you are confirming your agreement with the following:**

Start of Block: Current use of digital tools

Use of tools

Please think about the clinical, health or social care research that you are currently working on/have worked on in the last two years. We are interested to learn whether you have used any digital tools in the R & D department you work in. Specifically, we are interested in digital tools used for set up, recruitment of participants and management of clinical research studies.

In this study a digital tool is defined as an alternative to paper-based methods that is IT based or an online platform that aids any aspect of the research study set up, recruitment of participants and management. Electronic screening for participants at site level Remote monitoring via smart phone applications Local social media routes R & D department's website Text alerts

Think about the clinical research studies you have assisted with in your R & D

department over the past two years. Has your department used digital tools in the set up, recruitment and management/monitoring of clinical research?

☐ Yes (1)

☐ No (2)

If not used digital

What barriers have you encountered that have prevented you using digital tools in your R & D department? Please select all answer/s that apply.

☐ Concern digital tools would bias participant recruitment (8)

☐ GDPR concerns (10)

☐ Lack of budget (1)

☐ Stick to what worked in the past (2)

☐ Unaware of suitable digital tools (3)

☐ Would require training to use digital tools (7)

☐ Other (9) _____

Opt in non digital **By taking part in this survey, you also have the opportunity to take part in a qualitative one to one interview (most likely conducted remotely and at a time convenient for you). We anticipate the interview will take approximately between 30 and 60 minutes.**

During this interview, we will explore reasons for not using digital tools in set up, recruitment or monitoring of clinical, health or social care research in further depth and your views towards these tools.

If you are interested in taking part, please provide your name and email address below and we will be in touch shortly to provide further details.

- ☐ Yes I am interested in providing my contact details (1)
- ☐ No, I opt out of taking part in a qualitative interview (2)

Start of Block: Opt in interviews

Qualitative survey **By taking part in this survey, you also have the opportunity to take part in a qualitative one to one interview (most likely conducted remotely and at a time convenient for you). We anticipate the interview will take between 30-60 minutes.**

During this interview, we will explore your experiences about using digital tools in clinical research in further depth. We will ask you questions about the information you provided in this survey.

This study is part of a wider project to learn from people who have used digital tools within clinical research (including researchers) in order to learn about the benefits and drawbacks of these methods and inform researchers and related staff about the digital tools available to them.

If you are interested in taking part, please provide your name and email address below and we will be in touch shortly to provide further details.

- ☐ Yes I am interested in providing my contact details and I consent to the answers on this survey being discussed during the interview (1)
- ☐ No, I opt out of taking part in a qualitative interview (2)

Debriefing sheet
Debriefing sheet

Study title: Digitising Clinical Research

Thank you for taking part in the questionnaire-based study. Researchers Sophie Clohessy¹, Prof Theo Arvanitis¹, Dr Carla Toro¹, Dr Mark Elliott¹ carried out this study (1. Institute of Digital Health care, WMG, University of Warwick) with support from collaborators Carly Craddock^{2,3}, Mark Evans^{2,3} (2. The Royal Wolverhampton NHS Trust, Wolverhampton, UK, 3. National Institute for Health Research Clinical Research Network West Midlands, Birmingham, UK).

The purpose of this study is to identify local examples of digital platforms and approaches along with any barriers that may have delayed or stopped use of any digital tools. By taking part in this study, you had the opportunity to provide your contact details. If you chose to do so, we may invite you to take part in a qualitative interview study which will ask you about your experience with digital tools/platforms in further depth. Please be reminded that all data collected will remain confidential and anonymised. As mentioned in the information sheet, please note if you only partially completed the survey, we will still use the information that you provided up to the point that you stopped the survey. The findings of this study will be written up and published in a peer reviewed journal. The data will be stored securely on University of Warwick secure shared servers (M drive) for the standard data retention period of 10 years. The only people able to access the data will be the investigators of the project; Researchers Sophie Clohessy, Dr Carla Toro, Dr Mark Elliott, Professor Theo Arvanitis (Institute Digital Healthcare, WMG, University of Warwick).

If you have questions or concerns about the study please feel free to contact Sophie Clohessy, email s.clohessy@warwick.ac.uk.

You may wish to keep a copy of this debriefing sheet for your records.

Thank you for taking your time to complete our study, we hope you enjoyed the experience.

Please click on the next page to complete the study.
