Supplementary material to "Emulator-based Bayesian calibration of the CISNET colorectal cancer models."

Figure S1. Model outputs coverage of targets

S1.1 SimCRC

SimCRC targets coverage

S1.2 MISCAN-Colon

Calibration target

MISCAN targets coverage

■ 50% model predicted interquantile range ■ 95% model predicted interquantile range

S1.3 CRC-SPIN

Calibration target

CRC SPIN target coverage

■ 50% model predicted interquantile range ■ 95% model predicted interquantile range

Figure S2. R-hat values for convergence diagnostic and Effective-sample size for efficiency diagnostic.

Figure S3. Prior and posterior distributions of the calibrated input parameters for the three CISNET-CRC models

S3.1 SimCRC

S3.2 MISCAN-Colon

S3.3 CRC-SPIN

Note: Originally, the prior distributions of CRC-SPIN were set as uniform. However, due to the LHS draws stopping early when predictions fall out of range, this generates a non-uniform prior distribution.

Figure S4. Joint posterior distribution of the calibrated input parameters for the three CISNET-CRC models.

S4.2 MISCAN-Colon

S4.3 CRC-SPIN

Figure S5. Internal validation for CRC models.

S5.1 SimCRC

S5.2 MISCAN-Colon

BayCANN - MISCAN

S5.3 CRC-SPIN

Calibration target

BayCANN - CRC SPIN

■ 50% model predicted interquantile range ■ 95% model predicted interquantile range

Figure S6. Prediction performance of model outputs for the three CRC models (inputs and outputs are scaled within -1 to 1).

S6.1 SimCRC

S6.2 MISCAN-Colon

Model outputs (scaled)

S6.3 CRC-SPIN

Note: The early stop LHS draws for CRC-SPIN resulted in few outputs in low incidence levels, particularly in the age range of 20-49, as shown in the third and fourth row of the S6.3 figure.

Figure S7. ANN training time vs. total parameters in the ANN $\,$

ANN structure and training time

	Inputs	Hidden layers	Hidden nodes	Outputs	Total ANN trained parameters	Time (minutes)
SimCRC	30	4	360	110	571,070	39
MISCAN- Colon	37	4	114	93	67,467	26
CRC-SPIN	22	1	140	41	28,741	10

Table S8. Calibrated parameters for the three CRC CISNET Models

Table S8.1 SimCRC

Parameter	Description
AdOnset_Weibull_Shape	Shape parameter for the risk of developing an adenoma
AdOnset_Weibull_Scale	Scale parameter for the risk of developing an adenoma
AdOnset_PersonRisk_Gamma_Alpha	Individual risk parameter
AdGrowthMult_Variance	Variance for adenoma growth function
AdGrowthMult_ScaleTerm	Scale for adenoma growth function
Janoschek_Inflection	Inflection parameter for adenoma growth function
Janoschek_Rate_P	Rate parameter for growth function for an adenoma in the proximal colon
Janoschek_Rate_D	Rate parameter for growth function for an adenoma in the distal colon
Janoschek_Rate_R	Rate parameter for growth function for an adenoma in the rectum
CancerOnset_Weibull_Shape_P	Shape parameter for cancer onset function for an adenoma in the proximal colon
CancerOnset_Weibull_Shape_D	Shape parameter for cancer onset function for an adenoma in the distal colon
CancerOnset_Weibull_Shape_R	Shape parameter for cancer onset function for an adenoma in the rectum
CancerOnset_Weibull_Scale_P	Scale parameter for cancer onset function for an adenoma in the proximal colon
CancerOnset_Weibull_Scale_D	Scale parameter for cancer onset function for an adenoma in the distal colon
CancerOnset_Weibull_Scale_R	Scale parameter for cancer onset function for an adenoma in the rectum
Exp_Rate_PreclinProg_P	Rate parameter for progression of a preclinical cancer in the proximal colon
Exp_Rate_PreclinProg_D	Rate parameter for progression of a preclinical cancer in the distal colon
Exp_Rate_PreclinProg_R	Rate parameter for progression of a preclinical cancer in the rectum
pSxDetS1_P	Probability of detecting a stage I proximal colon cancer by symptoms
pSxDetS1_D	Probability of detecting a stage I distal colon cancer by symptoms
pSxDetS1_R	Probability of detecting a stage I rectal cancer by symptoms
pSxDetS2_P	Probability of detecting a stage II proximal colon cancer by symptoms
pSxDetS2_D	Probability of detecting a stage II distal colon cancer by symptoms
pSxDetS2_R	Probability of detecting a stage II rectal cancer by symptoms
pSxDetS3_P	Probability of detecting a stage III proximal colon cancer by symptoms
pSxDetS3_D	Probability of detecting a stage III distal colon cancer by symptoms
pSxDetS3_R	Probability of detecting a stage III rectal cancer by symptoms
pSxDetS4_P	Probability of detecting a stage IV proximal colon cancer by symptoms
pSxDetS4_D	Probability of detecting a stage IV distal colon cancer by symptoms
pSxDetS4_R	Probability of detecting a stage IV rectal cancer by symptoms

Table S8.2 MISCAN-Colon

Parameter	description
hazard variance	The variance of the Gamma distribution.
hazard mean uk	Relative risk in the UK compared to the US.
hazard mean nl	Relative risk in the Netherlands compared to the US.
age factors k	The value of the horizontal asymptote of the generalized logistic function.
	7 1 8 8
age_factors_logb	A measure for the slope at the point of inflection of the generalized logistic
age factors logv	function and the line symmetry in the point of inflection.
age factors M	The location of the point of inflection (x-coordinate).
non progr 0	The probability that an adenoma is non-progressive at age 0
non progr 45	The probability that an adenoma is non-progressive at age 45
non progr 65	The probability that an adenoma is non-progressive at age 65
non progr 100	The probability that an adenoma is non-progressive at age 100
small progr	The probability that a progressive adenoma does not grow larger than 10mm before it becomes a preclinical cancer
small non progr	The probability that a non-progressive adenoma never grows larger than 10mm.
dwell pcl shape	Determines the shape of the Weibull distribution for all preclinical cancer states.
dwell adn factor	The ratios are multiplied with this parameter to determine the mean dwell time for each adenoma state.
dwell pcl1	Scale of the Weibull distribution for the preclinical cancer state 1
dwell_pcl2	Scale of the Weibull distribution for the preclinical cancer state 2
dwell_pcl3	Scale of the Weibull distribution for the preclinical cancer state 3
dwell pcl4	Scale of the Weibull distribution for the preclinical cancer state 4
trans clin loc 12	The probability that a preclinical cancer starts showing clinical symptoms in stage 1 for rectal cancers.
trans_clin_loc_124	The probability that a preclinical cancer starts showing clinical symptoms in stage 2 for cancers in the left colon.
trans clin loc 14	The probability that a preclinical cancer starts showing clinical symptoms in stage 1 for cancers in the right colon
trans_cmi_loc_14	The probability that a preclinical cancer starts showing clinical symptoms in stage 2
trans_clin_loc_22	for rectal cancers.
trans clin loc 224	The probability that a preclinical cancer starts showing clinical symptoms in stage 2 for cancers in the left colon.
trans_enii_ioe_221	The probability that a preclinical cancer starts showing clinical symptoms in stage 2
trans_clin_loc_24	for cancers in the right colon
trans clin loc 32	The probability that a preclinical cancer starts showing clinical symptoms in stage 3 for rectal cancers.
trans enn 100 32	The probability that a preclinical cancer starts showing clinical symptoms in stage 3
trans clin loc 324	for cancers in the left colon.
trans clin loc 34	The probability that a preclinical cancer starts showing clinical symptoms in stage 3 for cancers in the right colon
<u> </u>	For stage 1 cancers, the transition probability is represented by quadratic function
trans clin age Maxp1	of age
trans_clin_age_Scale1	Scale factor 1 for transition probability from stage 1

trans_clin_age_Scale2	Scale factor 2 for transition probability from stage 1
trans clin age Pcl2100	Transition probabilities to from stage 2 clinical at age 100
trans clin age Pcl20	Transition probabilities to from stage 2 clinical at age 0
trans_clin_age_Pcl3100	Transition probabilities from stage 3 to clinical at age 100
trans clin age Pcl30	Transition probabilities from stage 3 to clinical at age 0
sensitivity_47FIT_a	The sensitivity of the FIT short before clinical diagnosis
sensitivity_47FIT_ratio	The sensitivity of the FIT long before clinical diagnosis

Table S8.3 CRC-SPIN

Parameter	description
ar.mean	Baseline log-risk
ar.sd	Standard dev., baseline log-risk
ar.fem	Female
ar.20to49	Age effect
ar.50to59	Age effect
ar.60to69	Age effect
ar.70plus	Age effect
growth.colon.beta1	Shape, colon
growth.colon.beta2	Scale, colon
growth.rectum.beta1	Shape, rectum
growth.rectum.beta2	Scale, rectum
richards.power	Richard's power
trans.prob.intercept	Intercept
trans.prob.fem	Female (vs male)
trans.prob.rectum	Rectal (vs colon)
trans.prob.fem.rectum	Female and Rectal
trans.prob.age	Age at initiation
trans.prob.agesq	Age at initiation sq.
trans.prob.sd	Standard dev., Trans. Prob.
mst.scale	Scale
mst.shape	Shape
mst.rectum	Rectal (vs colon)
