

## Graphical abstract

## Defective CAPSL function causes impaired retinal angiogenesis through the MYC axis and is associated with familial exudative vitreoretinopathy

Wenjing Liu<sup>1,2,4#</sup>, Shujin Li<sup>1,2#</sup>, Mu Yang<sup>1,2#</sup>, Jie Ma<sup>1#</sup>, Lu Liu<sup>1</sup>, Ping Fei<sup>3</sup>, Qianchun Xiang<sup>1</sup>, Lulin Huang<sup>1</sup>, Peiquan Zhao<sup>3\*</sup>, Zhenglin Yang<sup>1,2\*</sup>, Xianjun Zhu<sup>1,2,4\*</sup>

Supplementary data include Figure S1-S2, Table S1 to S3.

**Figure S1. Construction of EC-specific *Capsl* knockout mice model and CAPSL knockdown HRECs cell model.** (A) Strategy to generate a conditional *Capsl* allele in which exon 2 are knockout specifically in endothelial cells. (B) Diagram depicting the tamoxifen injection and experiment schedule for EC-specific deletion of *Capsl* in retinal vessels from P1 to P3 and their analyses timeline. (C) PCR of genomic DNA from Ctrl and *Capsl*<sup>iECKO/iECKO</sup> pups. Recombination of the floxed *Capsl* allele occurs only in Tamoxifen-injected animals that are *Pdgfb*-iCreER-positive. (D) Immunoblot and quantification of CAPSL knockout efficiency at both protein and mRNA level. Error bars indicate the SD. \*\*P < 0.01, \*\*\*\*P < 0.0001, by Student's t test (n = 3). (E) RT-PCR and RT-qPCR analysis of knockdown efficiency of lentivirus carrying shCAPSL. Error bars indicate the SD. \*\*\*\*P < 0.0001, by Student's t test (n = 3).

**Figure S2. Normal state of other cell types and ECM deposition in *Capsl* knockout mice retina.** **(A)** Co-staining of VEGFA (red) and IB4 (green) at angiogenic front and remodeling plexus in P5 retinas of Ctrl and *Capsl<sup>iECKO/iECKO</sup>* mice. Scale bar: 50  $\mu$ m. **(B)** Co-staining of Collagen IV (red) and IB4 (green) in P5 retinas of Ctrl and *Capsl<sup>iECKO/iECKO</sup>* mice. Scale bar: 50  $\mu$ m. **(C)** Maximum intensity projections and quantification of pericyte coverage of the superficial vascular plexus in P5 retinas of Ctrl and *Capsl<sup>iECKO/iECKO</sup>* mice stained with Desmin/NG2 (red) and IB4 (green). Scale bar: 50  $\mu$ m. Error bars indicate the SD. ns: no significance, by Student's t test ( $n = 6$ ). **(D)** Representative confocal images of biocytin TMR (red) and IB4 (green) in the retinal flat mounts from P5 Ctrl and *Capsl<sup>iECKO/iECKO</sup>* mice. Scale bar: 50  $\mu$ m. **(E)** Immunofluorescence staining and quantitative analysis of FN-1 (red) stained ECM deposition in retinas from P5 Ctrl

and *Capsl<sup>iECKO/iECKO</sup>* mice. Scale bar: 50  $\mu\text{m}$ . Error bars indicate the SD. ns: no significance, by Student's t test ( $n = 6$ ).

**Figure S3. CAPSL does not involve in Norrin/β-catenin signaling pathway.**

**(A)** Results of luciferase reporter assay of shCtrl-293STF cells and shCAPSL-293STF cells. Error bars indicate the SD. ns: no significance, by Student's t test ( $n = 6$ ). **(B)** Results of luciferase reporter assay of shCAPSL-293STF cells were transfected with plasmids containing *CAPSL* (WT, R30X, or L83F) or empty vector. Error bars indicate the SD. ns: no significance, by Student's t test ( $n = 5$ ).

**Table S1. Pathological prediction of *CAPS1* variants**

<b>Software</b>	<b>Variant</b>	<b>Prediction</b>
Mutation Taster	R30X	disease causing: amino acid sequence changed protein features (might be) affected splice site changes
	L83F	disease causing: amino acid sequence changed protein features (might be) affected
Polyphen-2	R30X	-
	L83F	Possibly damaging with a score of 0.777 (sensitivity: 0.85; specificity: 0.92)
PROVEAN	R30X	Score:-13.38, prediction: deleterious
	L83F	Score:-2.51, prediction: deleterious

**Table S2. Antibodies used for immunofluorescence studies.**

<b>Antibody</b>	<b>Manufacturer</b>	<b>States</b>	<b>Cat. No.</b>	<b>Dilution</b>
Isolectin-B4-Alexa488	Thermo Fisher	USA	I21411	1:200
VEGFA	R&D System	USA	AF-493-NA	1:100
Collagen IV	Millipore Sigma	USA	AB756P	1:100
Fibronectin-1	Sigma	USA	F3648	1:100
NG2	Millipore Sigma	USA	AB5320	1:200
Desmin	Abcam	UK	AB15200	1:100
ERG	Abcam	UK	Ab92513	1:200
GFAP	Cell Signaling Technology	USA	80788	1:200
DAPI	Cell Signaling Technology	USA	4083	1:2000
Donkey anti-Rabbit Alexa594	Invitrogen	USA	A-21207	1:500
Donkey anti-Goat Alexa594	Invitrogen	USA	A-11058	1:500
Donkey anti-Rabbit Alexa647	Invitrogen	USA	A-31573	1:500
