

Table S4. Average cost of an emergency department visit by care model and orientation

	Costs (in 2019 Canadian dollars) (n=78)						
	Ambulatory (n=62)				Stretcher (n=16)		
	EP n=28	PT + EP n=34			EP n=10	PT + EP n=6	
Care processes	Costs* – Median time values		Absolute difference (95% CI)	p	Costs* – Median time values		Absolute difference (95% CI)
Average cost of the ED visit	145.67 (117.20, 174.97)	214.19 (190.84, 238.22)	68.52 (29.80, 104.36)	<.01	559.91 (354.58, 828.67)	642.68 (389.93, 996.39)	82.77 (-303.11, 492.83)
ED check-in [¶]	98.07 (80.31, 117.73)	179.80 (166.30, 192.69)	81.73 (58.81, 103.84)	<.01	203.12 (170.25, 254.27)	336.49 (232.99, 477.36)	133.37 (16.64, 280.94)
ED stay [•]	0.00 (---)	0.00 (---)	---	---	235.57 (124.67, 377.55)	243.80 (116.62, 391.63)	8.23 (-198.28, 177.55)
Imaging	25.94 (15.86, 37.33)	13.99 (10.07, 18.11)	11.95 (0.97, 23.86)	.30	68.48 (26.84, 114.10)	34.06 (0.00, 92.54)	34.42 (-98.59, 36.14)
Laboratory tests	2.92 (0.00, 6.66)	4.53 (0.00, 14.00)	1.61 (-5.59, 11.47)	.99	16.63 (0.00, 55.42)	10.81 (0.00, 21.20)	5.82 (-44.29, 18.27)
Medication	0.99 (0.33, 1.81)	1.26 (0.11, 2.76)	0.27 (-1.26, 1.96)	.98	18.17 (9.59, 28.99)	9.11 (3.14, 15-56)	9.06 (-21.14, 1.61)
Musculoskeletal disorders [†]	17.75 (8.14, 29.97)	14.61 (7.90, 22.02)	3.14 (-17.47, 8.29)	.99	17.94 (0.00, 59.80)	8.40 (0.00, 18.77)	9.54 (-54.49, 15.41)

EP: emergency physician; PT: physiotherapist; CI: confidence interval; ED: emergency department

*Costs are presented as mean (95% confidence intervals obtained via non-parametric Bootstrap).

[¶] Includes ED arrival (clerk, nurse, nursing assistant), triage reassessment (if needed; nurse), assessment (emergency physician; if needed: physiotherapist, internist, social worker, occupational therapist), reassessment (if needed; emergency physician, physiotherapist), point-of-care ultrasound (if needed; emergency physician).

[•] Since all the parameters needed to calculate the ED stay cost are fixed (hours billed, patient ratio, ED length of stay), the average costs obtained are the same for all three scenarios.

[†] Musculoskeletal disorders care processes include supplying and advising on use for walking aids and orthoses (crutches, cane, walker or walking boot), and splinting (plaster cast, Jones splint, thoracobrachial splint, ankle splint or Zimmer splint).

Table S5. Average cost of an emergency department visit by care model and orientation according to different care process durations (sensitivity analyses)

Care processes	Costs (in 2019 Canadian dollars) (n=78)				
	EP n=28	PT + EP n=34		EP n=28	PT + EP n=34
Ambulatory (n=62)	Costs* – Q1 time values		p	Costs* – Q3 time values	
Average cost of the ED visit	103.13 (82.49, 123.81)	170.61 (153.97, 187.72)	<.01	203.51 (162.97, 248.01)	273.03 (240.48, 305.58)
