Table S1: High calcium foods based on the proposed method (sorted based on the score of free, very low, and low nutrients from highest to lowest). All high calcium foods except the high calcium baby foods are based on the reference energy intake of 2,000 kcal for adults and children aged 4 years and older. The high calcium baby foods are based on the reference energy intake of 1,000 kcal for children 1 through 3 years of age.

Table S2: Calcium source foods based on the proposed method (sorted based on the score of free, very low, and low nutrients from highest to lowest). All calcium source foods except the calcium source baby foods are based on the reference energy intake of 2,000 kcal for adults and children aged 4 years and older. The calcium source baby foods are based on the reference energy intake of 1,000 kcal for children 1 through 3 years of age.

Table S3: Cholesterol free foods based on the proposed method (sorted based on the score of free, very low, and low nutrients from highest to lowest). All cholesterol free foods except the cholesterol free baby foods are based on the reference energy intake of 2,000 kcal for adults and children aged 4 years and older. The cholesterol free baby foods are based on the reference energy intake of 1,000 kcal for children 1 through 3 years of age.

Table S4: Low cholesterol foods based on the proposed method (sorted based on the score of free, very low, and low nutrients from highest to lowest). All low cholesterol foods except the low cholesterol baby foods are based on the reference energy intake of 2,000 kcal for adults and children aged 4 years and older. The low cholesterol baby foods are based on the reference energy intake of 1,000 kcal for children 1 through 3 years of age.

Table S5: High choline foods based on the proposed method (sorted based on the score of free, very low, and low nutrients from highest to lowest). All high choline foods except the high choline baby foods are based on the reference energy intake of 2,000 kcal for adults and children aged 4 years and older. The high choline baby foods are based on the reference energy intake of 1,000 kcal for children 1 through 3 years of age.

Table S6: Choline source foods based on the proposed method (sorted based on the score of free, very low, and low nutrients from highest to lowest). All choline source foods except the choline source baby foods are based on the reference energy intake of 2,000 kcal for adults and children aged 4 years and older. The choline source baby foods are based on the reference energy intake of 1,000 kcal for children 1 through 3 years of age.

Table S7: High copper foods based on the proposed method (sorted based on the score of free, very low, and low nutrients from highest to lowest). All high copper foods except the high copper baby foods are based on the reference energy intake of 2,000 kcal for adults and children aged 4 years and older. The high copper baby foods are based on the reference energy intake of 1,000 kcal for children 1 through 3 years of age.

Table S8: Copper source foods based on the proposed method (sorted based on the score of free, very low, and low nutrients from highest to lowest). All copper source foods except the copper source baby foods are based on the reference energy intake of 2,000 kcal for adults and children aged 4 years and older. The copper source baby foods are based on the reference energy intake of 1,000 kcal for children 1 through 3 years of age.

Table S9: High dietary fiber foods based on the proposed method (sorted based on the score of free, very low, and low nutrients from highest to lowest). All high dietary fiber foods except the high dietary fiber baby foods are based on the reference energy intake of 2,000 kcal for adults and children aged 4 years and older. The high dietary fiber baby foods are based on the reference energy intake of 1,000 kcal for children 1 through 3 years of age.

Table S10: Dietary fiber source foods based on the proposed method (sorted based on the score of free, very low, and low nutrients from highest to lowest). All dietary fiber source foods except the dietary fiber source baby foods are based on the reference energy intake of 2,000 kcal for adults and children aged 4 years and older. The dietary fiber source baby foods are based on the reference energy intake of 1,000 kcal for children 1 through 3 years of age.

Table S11: Energy free foods based on the proposed method (sorted based on the score of free, very low, and low nutrients from highest to lowest). All energy free foods except the energy free baby foods are based on the reference energy intake of 2,000 kcal for adults and children aged 4 years and older. The energy free baby foods are based on the reference energy intake of 1,000 kcal for children 1 through 3 years of age.

Table S12: Low energy foods based on the proposed method (sorted based on the score of free, very low, and low nutrients from highest to lowest). All low energy foods except the low energy baby foods are based on the reference energy intake of 2,000 kcal for adults and children aged 4 years and older. The low energy baby foods are based on the reference energy intake of 1,000 kcal for children 1 through 3 years of age.

Table S13: High folate foods based on the proposed method (sorted based on the score of free, very low, and low nutrients from highest to lowest). All high folate foods except the high folate baby foods are based on the reference energy intake of 2,000 kcal for adults and children aged 4 years and older. The high folate baby foods are based on the reference energy intake of 1,000 kcal for children 1 through 3 years of age.

Table S14: Folate source foods based on the proposed method (sorted based on the score of free, very low, and low nutrients from highest to lowest). All folate source foods except the folate source baby foods are based on the reference energy intake of 2,000 kcal for adults and children aged 4 years and older. The folate source baby foods are based on the reference energy intake of 1,000 kcal for children 1 through 3 years of age.

Table S15: High iron foods based on the proposed method (sorted based on the score of free, very low, and low nutrients from highest to lowest). All high iron foods except the high iron baby foods are based on the reference energy intake of 2,000 kcal for adults and children aged 4 years and older. The high iron baby foods are based on the reference energy intake of 1,000 kcal for children 1 through 3 years of age.

Table S16: Iron source foods based on the proposed method (sorted based on the score of free, very low, and low nutrients from highest to lowest). All iron source foods except the iron source baby foods are based on the reference energy intake of 2,000 kcal for adults and children aged 4 years and older. The iron source baby foods are based on the reference energy intake of 1,000 kcal for children 1 through 3 years of age.

Table S17: High magnesium foods based on the proposed method (sorted based on the score of free, very low, and low nutrients from highest to lowest). All high magnesium foods except the high magnesium baby foods are based on the reference energy intake of 2,000 kcal for adults and children aged 4 years and older. The high magnesium baby foods are based on the reference energy intake of 1,000 kcal for children 1 through 3 years of age.

Table S18: Magnesium source foods based on the proposed method (sorted based on the score of free, very low, and low nutrients from highest to lowest). All magnesium source foods except the magnesium source baby foods are based on the reference energy intake of 2,000 kcal for adults and children aged 4 years and older. The magnesium source baby foods are based on the reference energy intake of 1,000 kcal for children 1 through 3 years of age.

Table S19: High manganese foods based on the proposed method (sorted based on the score of free, very low, and low nutrients from highest to lowest). All high manganese foods except the high manganese baby foods are based on the reference energy intake of 2,000 kcal for adults and children aged 4 years and older. The high manganese baby foods are based on the reference energy intake of 1,000 kcal for children 1 through 3 years of age.
