Table S33: Saturated fat free foods based on the proposed method (sorted based on the score of free, very low, and low nutrients from highest to lowest). All saturated fat free foods except the saturated fat free baby foods are based on the reference energy intake of 2,000 kcal for adults and children aged 4 years and older. The saturated fat free baby foods are based on the reference energy intake of 1,000 kcal for children 1 through 3 years of age.

Table S34: Low saturated fat foods based on the proposed method (sorted based on the score of free, very low, and low nutrients from highest to lowest). All low saturated fat foods except the low saturated fat baby foods are based on the reference energy intake of 2,000 kcal for adults and children aged 4 years and older. The low saturated fat baby foods are based on the reference energy intake of 1,000 kcal for children 1 through 3 years of age.

Table S35: High selenium foods based on the proposed method (sorted based on the score of free, very low, and low nutrients from highest to lowest). All high selenium foods except the high selenium baby foods are based on the reference energy intake of 2,000 kcal for adults and children aged 4 years and older. The high selenium baby foods are based on the reference energy intake of 1,000 kcal for children 1 through 3 years of age.

Table S36: Selenium source foods based on the proposed method (sorted based on the score of free, very low, and low nutrients from highest to lowest). All selenium source foods except the selenium source baby foods are based on the reference energy intake of 2,000 kcal for adults and children aged 4 years and older. The selenium source baby foods are based on the reference energy intake of 1,000 kcal for children 1 through 3 years of age.

Table S37: Sodium free foods based on the proposed method (sorted based on the score of free, very low, and low nutrients from highest to lowest). All sodium free foods except the sodium free baby foods are based on the reference energy intake of 2,000 kcal for adults and children aged 4 years and older. The sodium free baby foods are based on the reference energy intake of 1,000 kcal for children 1 through 3 years of age.

Table S38: Very low sodium foods based on the proposed method (sorted based on the score of free, very low, and low nutrients from highest to lowest). All very low sodium foods except the very low sodium baby foods are based on the reference energy intake of 2,000 kcal for adults and children aged 4 years and older. The very low sodium baby foods are based on the reference energy intake of 1,000 kcal for children 1 through 3 years of age.

Table S39: Low sodium foods based on the proposed method (sorted based on the score of free, very low, and low nutrients from highest to lowest). All low sodium foods except the low sodium baby foods are based on the reference energy intake of 2,000 kcal for adults and children aged 4 years and older. The low sodium baby foods are based on the reference energy intake of 1,000 kcal for children 1 through 3 years of age.

Table S40: High thiamin foods based on the proposed method (sorted based on the score of free, very low, and low nutrients from highest to lowest). All high thiamin foods except the high thiamin baby foods are based on the reference energy intake of 2,000 kcal for adults and children aged 4 years and older. The high thiamin baby foods are based on the reference energy intake of 1,000 kcal for children 1 through 3 years of age.

Table S41: Thiamin source foods based on the proposed method (sorted based on the score of free, very low, and low nutrients from highest to lowest). All thiamin source foods except the thiamin source baby foods are based on the reference energy intake of 2,000 kcal for adults and children aged 4 years and older. The thiamin source baby foods are based on the reference energy intake of 1,000 kcal for children 1 through 3 years of age.
