¹ The date the first case was present in the respective states.

² The cumulative number of cases in the respective state at the time the intervention was implemented.

³ Start and end dates of intervention implementation (NYC, 2020).

⁴ Re-expansion indicates states that reverted back to stricter guidelines on mass gatherings after restrictions had been loosened.

⁵ The number of days the intervention was implemented from start to end dates.

⁶ Italicized July 1st dates represent an arbitrary end date chosen as a data cutoff point for this study.

⁷ North Dakota did not implement a ban on mass gatherings.
