Figure S2. Dendrogram of Nevada specimens in context of other sequenced

The five clades are colored

6

26

27 19A (blue), 19B (teal), 20A (green), 20B (yellow) and 20C (orange).

Figure S3. Global distribution of clades from March 6th to June 5th. Pie charts depict

29 the proportion of the clades within (a) four main areas in Nevada, these include 91

(yellow) and 20C (orange). (b) Pie chart of the clades in each indicated country from March 6th to June 5th generated from a subsampling of sequences deposited in Nextstrain.org. The size of the pie chart corresponds to the relative specimen number for each region.
